

HEBERT WATER SYSTEM

6252 Hwy 561

Columbia, La. 71418

Hebert Water is required to complete a lead service line inventory and submit it to La. Department of Health and Hospitals. We are now mandated to inventory lead service lines on our side of the meter and on the customer's side. We will identify any lead lines on our side of the meter. Please help us identify customer lead service lines. Most service line connections in the area will be nonlead but we must have a written record for each connection. Please answer the following questions concerning your water connection. **Connections with lead must comply with EPA replacement guidelines.**

Water Service Connection Survey	
NAME	CUSTOMER #
SERVICE ADDRESS	LOCATION#
METER#	MIU#
Was your water line connection to your home installed after 1988?	YES or NO
If yes, this is after the lead ban on water supply materials. Your connection would be non-lead. Go to bottom of form, circle material used and certify the data.	
In no, please tell us the estimated date of installation. (IF YOU DON'T KNOW INSTALLATION DATE, STILL PROVIDE MATERIAL USED AT YOUR CONNECTION)	
Circle the material used in your installation LEAD / NON-LEAD (TYPE) PVC, GALVANIZED, PECS
